

## Everything you need to know

### about applying to TKS Program

**Eligibility requirements:** TKS is for high school students ages 13-17, with a passion for global impact and genuine curiosity to level up and learn.

Let's begin

## Understand the process.

### **Create your profile:**

Set up a user profile in our application hub.

### **Written application:**

Answer 2 brief questions.

### **Decision:**

Your application will be reviewed by TKS. Secure your spot with payment if accepted.

### **Introduce yourself:**

Share some basic info about yourself and how to contact you.

### **Interview:**

You'll be invited to submit a video response or attend a group interview, depending on location. Details in the application hub.

## Sneak a peek

# Application process

They want you to get into TKS, and their process is simple and transparent. There are two steps:

### 1. Written Questions (20 minutes)

- **Teach them something:** Share a topic you're excited about—it doesn't have to be tech-related.
- **What are you proud of?** Tell them about an accomplishment, a challenge you overcame, or a project you built.

### 2. Interview (20 minutes)

- **Virtual program:** Record a short video response.
- **In-person program:** Join a group interview with your city director.

This process is designed to understand your curiosity, ambition, and motivation. They're excited to hear your story.

## Get accepted

### What they look for

During the application process, they focus on three key traits:

- **Curiosity:** You love learning about science, tech, and how the world works. You don't need to know everything, but you're excited to ask questions and explore new ideas.
- **Drive for Impact:** You want to solve big challenges and make the world better. You're excited about the future and ready to explore unconventional paths.
- **Willingness to Work Hard:** TKS isn't passive learning—it's about doing. You're ready to put in the effort, build things, break things, and try again until you make progress.

If this sounds like you, TKS could be the place to start your journey.

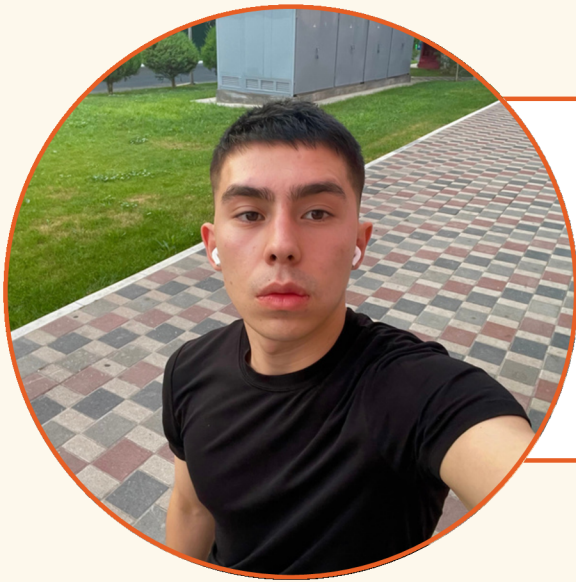

## Application toolkit

### How to prepare?

These tips aren't requirements—they're just suggestions to help you get ready and feel confident about your application:

- **Dive into what excites you:** Explore a topic that sparks your curiosity. At TKS, it's all about learning what you're passionate about—not what someone else tells you to study.
- **Learn from others:** Check out past TKS interviews to see what great answers look like. Want more inspiration? Explore books, blogs, and podcasts from people leading their fields.
- **Build something:** Whether it's a DIY experiment, a personal project, or teaching yourself to code, get hands-on. TKS is about learning by doing.

Your application is a chance to show them your curiosity, passion, and creativity. These tips are here to help you bring your best.

**Insider tips** from **Husan Mavlonov**,  
a full scholarship recipient at TKS and a  
Mentor at @unlockuz.

- **Brag Chain**

I still remember the comment I got from my interviewer that went, “We like applicants who brag, but we start loving them when they explain how and why one's success led to the next.” Since then, flexing has never meant sharing. It meant to understand the meaning behind being proud of yourself.

- **Outsider**

Mostly, TKS interviews 3–4 people at once to sort out only one applicant in a room, be it all geniuses or dunces. You must have the sense to observe others and prove why you're different from them. You might have the same eyes, tone, and intention with a roommate, but the background and goals make you the **ONE**.

- **Passion Project**

It is known that after passing the last stage, you are allowed to present an optional project, which is the factor that can make or break your application. Also, it was known that **90%** of scholarship recipients had at least one passion project while applying for a scholarship.
